

Bone densitometry

NORTH COAST
Radiology

PATIENT

Name

DOB

REQUEST

item 12306

One service only in a 24 month period

- Confirmation of a presumptive diagnosis of low bone mineral density made on the basis of one or more fractures occurring after minimal trauma.
- Monitoring of low bone mineral density proven by previous bone densitometry. (low BMO is present when BMO > 2.5 SO below young normal mean or > 1.5 SO below age matched mean).

item 12315

One service only in a 24 month period.

Diagnosis & monitoring of bone loss associated with one or more of the following:

- primary hyperparathyroidism
- chronic liver disease
- chronic renal disease
- proven malabsorptive disease
- rheumatoid arthritis
- conditions associated with thyroxine excess

item 12312

One service only in a 12 month period.

Diagnosis & monitoring of bone loss associated with one or more of the following conditions:

- prolonged glucocorticoid therapy
- conditions associated with excess glucocorticoid secretion
- male hypogonadism female hypogonadism lasting > 6months before age 45 years

item 12321

One service only in a 12 month period.

- Measurement of BMO 12 months following a significant change in therapy for established low bone mineral density. (change in class of drugs rather than change in dose regime)

item 12323

- Patients aged at least 70 years, not being a service associated with a service to which items 12306,12309,12312,12315,12318, & 12321 apply.

ROUTINE BMD MEASUREMENT

- Includes all other indications. No Medicare Benefit applicable. Our normal fee applies.
